AKSH OPTIFIBRE LTD. PLANTED 15,000 SAPPLINGS AND ADOPTED TWO GOVT. SCHOOLS FOR RENOVATION UNDER CSR INITIATIVE

UPVAN (An Initiative under CSR, to make Bhivadi city Clean and Green)

Aksh Optifibre Limited took the initiative named "Upvan" under the Corporate Social Responsibility to make an impact on the environment. The company successfully concluded the plantation of over 15,000 saplings in Bhivadi. The phase I of the plantation drive was started in June. It started at creating a "Green and Clean" Bhivadi city with the cooperation of Industries. The company has further extended its efforts and hopes to plant over 100,000 saplings in the next five years.

C. S. Gupta, Plantation Drive Lead-Aksh Optifibre Ltd., says "Since Bhivadi Industrial Area is amongst the highest polluted industrial areas of the country, owing to a large number of steel industries in the area, the objective of the drive is to make people and industries aware about the negative effects of pollution on the environment. We being one of the old and renowned establishments here in Bhivadi, are committed to keep the Bhivadi city Green as to make it a better place to live. Many schools, colleges, prominent social workers and people living in villages near the industrial area are actively supporting the ongoing drive."

MUSKAN (An Initiative under CSR, to support girl child and primary education)

"Muskan", another effort of Aksh Optifibre Ltd. Under CSR started in July 2014 to make an impact on the girl child education and primary education in India. Under "Muskan" Project the company has adopted two Govt. Schools, one in village Sathalka, Distt. Alwar (near its manufacturing plant in Bhivadi) and other in village Faranapampa, Distt. Sikar (near its manufacturing plant in Roorkee) and has successfully completed the renovations of the school buildings and playground, distribution of school uniforms to the children and provision of clean toilet, especially for the girls of the school. The company has installed water treatment system for the provision of clean drinking water to the children of the school.

Apart from this, the company has also setup a state-of-the-art computer lab with trainer for the students where they can hone their computer skills and be future ready with the aid of technology.

Mr. Anil Gupta, CSR Head- Aksh Optifibre Limited said "We are extremely delighted to be associated with the schools and helping improve the quality of education for the children with the availability of good infrastructure and facilities. We are

hoping to reduce the number of girl children dropping out of schools in this area so that they may complete at least basic primary education. Efforts need to be made at the primary level itself in order to create perspective amongst the girl children and their families so that they may continue their education further. This is our effort in ensuring that this momentum is created at the grass root levels."

Both these initiatives "Upvan" and "Muskan" received overwhelming appreciation from the local industry bodies such as Bhivadi Manufacturers Association (BMA), RICO, Indian Medical Association (IMA), Bhavani Vikas Parishad, Bhavani and other industry bodies active in the region.

Aksh Optifibre Ltd. had utilized the 95% of its annual CSR budget and looking ahead to make significant improvements in the other sectors of the society like Skill Development of the Local people by tying up with NABARD for skill development opportunities to the unskilled and unemployable population of nearby villages in next FY 2015-16.
